FOR IMMEDIATE RELEASE:

Local Hacker Group chosen as a winner 2014 "LulzBot Hackerspace Giveaway" Worldwide Contest

Watertown, Connecticut – March 7, 2015 – **CT Hackerspace**, local group of technology enthusiasts, were chosen as one of the winners picked in a worldwide contest for effectively demonstrating a passion for user innovation and creativity, especially within the open source and 3D printing industry.

Many members at CT hackerspace see the full value in what open source can mean with a direct correlation to innovation. William Saturno, president at CT Hackerspace commented, “ We are very excited to see that Lulzbot recognizes our commitment to open source by choosing CT Hackerspace as a winner to their 3D printer giveaway contest . We look forward to working with a community with innovation at the core of their “open” philosophy. The Lulzbot Mini 3D printer will be a great tool to have in pursuing future inventions and creations by both our members and our surrounding community”.

A Hackerspace is an open community lab, workshop and / or studio where people of diverse backgrounds can come together to share resources and knowledge to create and invent all types of things. CT Hackerspace encourage those interested to stop by, visit, and learn more about CT Hackerspace.

Open source is a philosophy that hardware and software created is made freely available and may be redistributed and modified for the benefit of the entire community.

Upcoming plans at CT Hackerspace include talks, classes, and seminars for the public, as well continuing to build innovative group projects. They hope that their space and activities will benefit the community and be a source of inspiration for those seeking to meet and work with like-minded creative people.
